

Service	Turku Campus	Academic non-profit organizations	Companies
Protein identification by MS (sample ready for analysis) Includes MS analysis ¹ and a database search			
	71 € / sample	110 € / sample	
Protein identification by MS (for gel separated samples)* Includes in-gel digestion, MS analysis ¹ and a database search			
	159 € / sample	280 € / sample	390 € / sample
Protein identification by MS (soluble sample) ² Includes in-solution digestion, MS analysis and a database search			
	145 € / sample	250 € / sample	345 € / sample
Protein identification by MS (soluble sample in MS incompatible solution) Includes sample preparation by a FASP method, MS analysis ¹ and a database search			
	168 € / sample	290 € / sample	405 € / sample
Protein identification by MS (proteins bound on magnetic beads) Includes on-beads digestion, MS analysis ¹ and a database search			
	145 € / sample	250 € / sample	345 € / sample
Other services			
Protein size determination by ESI	133 € / sample	234 € / sample	325 € / sample
Protein quantification by label-free DDA or DIA methods	Pricing according to instrument time, sample preparation requirements and data analysis requirements. Please consult the facility for detailed pricing.		
Phosphoprotein analysis by MS			
Targeted protein quantification by SRM or PRM			
Large-scale proteomics projects			
Bioinformatics, user training (instruments & software) & consulting			

Prices do not include VAT

* Maximum size for a gel piece per sample is 0.5 x 1 cm.

¹ LC/ESI-MS/MS includes up to a 1 hour of instrument analysis time and a wash between samples. There will be an extra charge if customer wants a longer method to be used.

² Samples need to be in MS compatible solution.
