<b>Protein identification by MS</b> (sample ready for analysis) Includes MS analysis <sup>1</sup> and a database search			
	102 € / sample	112 € / sample	240 € / sample
<b>Protein identification by MS</b> (for gel separated samples* or for soluble samples in MS incompatible solution) Includes in-gel digestion or sample preparation by a FASP method, MS analysis <sup>1</sup> and a database search			
	181 € / sample	196 € / sample	420 € / sample
<b>Protein identification by MS</b> (soluble sample <sup>2</sup> or proteins bound on magnetic beads) Includes in-solution digestion, MS analysis and a database search			
	156 € / sample	171 € / sample	369 € / sample
<b>Other services</b>			
Protein size determination by ESI	176 € / sample	191 € / sample	383 € / sample
Protein quantification by label-free DDA or DIA methods	Pricing according to instrument time, sample preparation requirements and data analysis requirements. Please consult the facility for detailed pricing.		
Phosphoprotein analysis by MS			
Targeted protein quantification by SRM or PRM			
Large-scale proteomics projects			
User training (instruments & software) & consulting			

**Prices do not include VAT**

\* Maximum size for a gel piece per sample is 0.5 x 1 cm.

<sup>1</sup> LC/ESI-MS/MS includes up to a 1 hour of instrument analysis time and a wash between samples. There will be an extra charge if customer wants a longer method to be used.

<sup>2</sup> Samples need to be in MS compatible solution.
